SECTION 4 – FIRST AID MEASURES

| SKIN CONTACT | Remove from skin & immediately flush w/ water for 15 minutes. Seek medical attention if irritation or ill effects develop or persist. |
| EYE CONTACT | Immediately flush w/ water for 15 minutes. |
| INHALATION | Remove to fresh air. Seek medical attention if ill effects persist. |
| INGESTION | Seek medical attention. Do not induce vomiting unless directed by medical personnel. Note to Physician: Treat according to person’s condition & specifics of exposure. |
SECTION 5 – FIRE FIGHTING MEASURES

**FLAMMABLE**
- Yes ☒ No ☐

**EXTINGUISHING MEDIA**
- Large fires: use dry chemical, foam or water spray. Small fires: use carbon dioxide (CO2), dry chemical or water spray. Water can be used to cool fire exposed containers.

**FLASHPOINT (°F) & METHOD**
- NA

**LOWER EXPLOSIVE LIMIT (% BY VOLUME)**
- Not determined.

**UPPER EXPLOSIVE LIMIT (% BY VOLUME)**
- Not determined.

**UNUSUAL FIRE & EXPLOSION HAZARDS**
- None.

**SPECIAL FIREFIGHTING PROCEDURES**
- Self-contained breathing apparatus & protective clothing in fighting large fires involving chemicals. Water spray to keep fire exposed containers cool. Determine need to evacuate or isolate area according to local emergency plan.

SECTION 6 – ACCIDENTAL RELEASE MEASURES

**PROCEDURES**
- Observe personal protective equipment recommendations in Sections 5 & 8. Scrape up & contain for salvage/disposal. Clean area as appropriate; spilled material may present a slip hazard. Final cleaning may require use of steam, solvents or detergents. Dispose of saturated absorbent or cleaning materials appropriately, since spontaneous heating may occur. Local, state & federal laws & regulations may apply to releases & disposal of material, as well as materials & items used in cleanup. You must determine which federal, state & local laws & regulations are applicable. Sections 13 & 15 provide some information regarding certain federal & state requirements.

SECTION 7 – HANDLING & STORAGE

**HANDLING PROCEDURES & EQUIPMENT**
- Use w/ adequate ventilation. Product evolves methyl ethyl Ketoxime (MEKO) when exposed to water or humid air.
  - Provide ventilation during use to control MEKO within exposure limits or use respiratory protection.
  - Avoid eye contact. Avoid skin contact. Avoid breathing vapor. Keep container closed. Do not take internally.

**STORAGE REQUIREMENTS**
- Keep container closed & store away from water or moisture.

SECTION 8 – EXPOSURE CONTROL / PERSONAL PROTECTION

**RESPIRATORY**
- Use respiratory protection unless adequate local exhaust ventilation is provided or exposure assessment demonstrates that exposures are within guidelines. Follow OSHA respirator regulations (29 CFR 1910.134) & use NIOSH/MSHA approved respirators. Protection provided by air purifying respirators against exposure to any hazardous chemical is limited. Use positive pressure air supplied respirator if there is potential for uncontrolled release, exposure levels are unknown or any other circumstances where air purifying respirators may not provide adequate protection.

**EYEWEAR**
- Use proper protection – safety glasses as a minimum. Full face respirator for spills.

**CLOTHING / GLOVES**
- Wash before breaks, @ mealtime & @ end of shift. If skin contact occurs, change contaminated clothing ASAP & thoroughly flush affected areas w/ cool water. Chemical protective gloves recommended.

**HYGENIC PRACTICES**
- Avoid skin contact by implementing good industrial hygiene practices & procedures. Precautionary Measures: Avoid eye contact. Avoid skin contact. Avoid breathing vapors. Keep container closed. Do not take internally. Use reasonable care.

SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

**PHYSICAL STATE**
- Viscous paste

**ODOR & APPEARANCE**
- Mild odor, clear or colored paste consistency.

**SPECIFIC GRAVITY**
- Approximately 1.0 to 1.25

**VAPOR DENSITY (AIR=1)**
- Not determined.

**EVAPORATION RATE**
- Not determined.

**BOILING RANGE (°F)**
- Not determined.

**pH**
- Not determined.

**SOLUBILITY IN WATER**
- Not determined.

**VAPOR PRESSURE (MM Hg)**
- Not determined.

**%/WT VOLATILE (TNV)**
- Not determined.

SECTION 10 – STABILITY AND REACTIVITY

**STABILITY**
- ☒ Yes ☐ No

**INCOMPATABILITY**
- ☒ Yes ☐ No

**CONDITIONS TO AVOID**
- Oxidizing material can cause a reaction.

**HAZARDOUS POLYMERIZATION/HAZARDOUS DECOMPOSITION PRODUCTS**
- Hazardous polymerization will not occur. Thermal breakdown of product during fire or very high heat conditions may evolve carbon oxides & traces of incompletely burned carbon compounds. Silicon dioxide, Formaldehyde, Nitrogen oxides & Metal oxides may also evolve.

**DATA WITH POSSIBLE RELEVANCE TO HUMANS**

Methyl Ethyl Ketoxime (MEKO) formed upon contact with water or humid air. Male rodents exposed to MEKO vapor throughout their lifetime developed liver cancer. Additional testing planned by MEKO supplier to determine any relevance to humans. Until more data is known, exposure levels should be maintained as low as achievable.
