I  Product:  CLOROX® WASHING MACHINE CLEANER
Description:  CLEAR ALKALINE LIQUID WITH A CHLORINE ODOR

II Health Hazard Data
CORROSIVE to the eyes. Injures eyes, skin and mucous membranes on contact. Harmful if swallowed; nausea, vomiting, and burning sensation of the mouth and throat may occur. No adverse health effects are expected with recommended use. Occasional clinical reports suggest a low potential for sensitization upon exaggerated exposure to sodium hypochlorite if skin damage (e.g. irritation) occurs during exposure. However, clinical tests conducted on intact skin using a product similar to Clorox® ProResults Composite Deck Cleaner found no sensitization in the test subjects.

FIRST AID:
EYE CONTACT: Immediately flush eyes with water for 15 minutes. If irritation persists, call a doctor.
SKIN CONTACT: Remove contaminated clothing. Flush skin with water. If irritation persists, call a doctor.
INGESTION: Drink a glassful of water. DO NOT induce vomiting. Immediately contact a doctor or poison control center.
INHALATION: Remove from exposure to fresh air. If breathing problems develop, call a doctor.

IV Special Protection and Precautions
Hygienic Practices: Wash hands after direct contact. Do not wear product-contaminated clothing for prolonged periods.
Engineering Controls: Use local exhaust to minimize exposure to product vapor or mist.
Personal Protective Equipment: Wear safety glasses. Wear rubber or neoprene gloves if there is the potential for repeated or prolonged skin contact. In situations where exposure limits may be exceeded, a NIOSH-approved respirator is advised.

VI Spill Procedures/Waste Disposal
Spill Procedures: Absorb and containerize. Wash residual down to sanitary sewer. Contact the sanitary treatment facility in advance to assure ability to process washed-down material. For spills of multiple products, responders should evaluate the MSDS’s of the products for incompatibility with sodium hypochlorite. Breathing protection should be worn in enclosed, and/or poorly ventilated areas until hazard assessment is complete.
Waste Disposal: Dispose must be made in accordance with applicable federal, state and local regulations.

VII Reactivity Data
Stable under normal use and storage conditions. Reacts with other household chemicals such as toilet bowl cleaners, rust removers, acids or ammonia containing products to produce hazardous gases, such as chlorine and other chlorinated species. Prolonged contact with metals may cause pitting or discoloration.

IX Physical Data
pH.................................................................~13.2
Specific gravity (H₂O=1).................................1.08 - 1.11
Solubility in water........................................Complete
