MATERIAL SAFETY DATA SHEET

SECTION 1 - PRODUCT AND COMPANY IDENTIFICATION

Manufacturer's name and address: The W.W. Henry Company
400 Ardex Park Drive
Aliquippa, PA, U.S.A.
15001

Supplier's name and address: Refer to Manufacturer

Information Telephone No.: (724) 203-8000
Visit our Website: http://www.wwhenry.com

24 Hr. Emergency Tel #: CHEM-TEL: 1-800-255-3924 OR 1-813-248-0585 (call collect)

Product Identifier: HENRY 452 EpoxyPro Part A

Chemical Name: N/Ap
Chemical Family: Mixture.

Chemical Formula: N/Ap
Trade Name/Synonyms: Henry® 452 Part A

Molecular Weight: N/Ap
Material Use: General purpose, two-part epoxy flooring adhesive.

WHMIS Classification: Class D2B (Materials Causing Other Toxic Effects, Toxic Material)
HMIS Rating: * - Chronic hazard 0 - Minimal 1 - Slight 2 - Moderate 3 - Serious 4 - Severe

Health: *2
Flammability: 1
Reactivity: 1

Note: This product does NOT contain asbestos.

This material is classified as hazardous under OSHA regulations (29CFR 1910.1200).

SECTION 3 - HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Off white paste. Slight epoxy odour.

Warning!
Polymerization occurs when components are mixed. Potential for exothermic hazard. Causes eye irritation.
May cause skin sensitization. Prolonged or repeated skin contact may cause drying and irritation.
May cause mild respiratory irritation at higher temperatures.

***POTENTIAL HEALTH EFFECTS***

Target organs: Eyes, skin, respiratory system and digestive system.

Routes of exposure: Inhalation: YES Skin Absorption: NO Skin & Eyes: YES Ingestion: YES

Signs and symptoms of short-term (acute) exposure

Inhalation: May cause mild respiratory irritation at higher temperatures.
Skin: May cause mild transient irritation.
Eyes: May cause moderate eye irritation. Symptoms will include pain, redness and tearing.
Ingestion: Ingestion of large amounts may cause stomach irritation. Symptoms may include nausea and vomiting.

Effects of long-term (chronic) exposure

Prolonged or repeated contact may cause drying, cracking and defatting of the skin.
Conditions aggravated by overexposure:
- Pre-existing skin, eye and respiratory disorders.
- See TOXICOLOGICAL INFORMATION, Section 11.
- Possible sensitizer. See TOXICOLOGICAL INFORMATION, Section 11.
- See ECOLOGICAL INFORMATION (Section 12).

SECTION 4 - FIRST AID MEASURES

Inhalation: If inhaled, move to fresh air. If irritation persists, seek prompt medical attention.
Skin contact: Remove contaminated clothing. Wash off with soap and plenty of water. If irritation persists, seek prompt medical attention.
Eye contact: Flush with plenty of water. If irritation persists, seek prompt medical attention.
Ingestion: Never give anything by mouth to an unconscious person. Rinse mouth with water. Do NOT induce vomiting. Have victim drink one to two glasses of water. Seek immediate medical attention/advice.

Notes For Physician: Treat symptomatically.

SECTION 5 - FIRE FIGHTING MEASURES

Fire hazards/conditions of flammability:
- Not flammable under normal conditions of use. Closed containers may rupture if exposed to excess heat or flame due to a build-up of internal pressure.

Flammability classification (OSHA 29 CFR 1910.1200):
- Non-flammable.

Flash point: > 204.4°C / 400°F
Flash point Method: N/Av Auto-ignition temperature: N/Av
Lower flammable limit (% by vol.): N/Av
Upper flammable limit (% by vol.): N/Av
Oxidizing properties: None.
Flame Projection Length: Not applicable.
Flashback observed: Not applicable.

Explosion data: Sensitivity to mechanical impact / static discharge:
- Not expected to be sensitive to mechanical impact or static discharge.

Suitable extinguishing media:
- Dry chemical, foam, carbon dioxide and water fog. Do not use water jet, as this may spread burning material.

Special fire-fighting procedures/equipment:
- Firefighters should wear proper protective equipment and self contained breathing apparatus with full face piece operated in positive pressure mode. Move containers from fire area if safe to do so. Water spray may be useful in cooling equipment exposed to heat and flame. After fires have been extinguished, carefully clean all equipment and surfaces exposed to fumes.

Hazardous combustion products:
- Carbon oxides; Aldehydes; Acids; Phenol; other unidentified organic compounds.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions:
- Restrict access to area until completion of clean-up. All persons dealing with clean-up should wear the appropriate chemically protective equipment. Refer to point 8 on this Safety Data Sheet, EXPOSURE CONTROLS / PERSONAL PROTECTION, for additional information on acceptable personal protective equipment.

Environmental precautions:
- Do not allow product to enter waterways. Do not allow material to contaminate ground water system.

Spill response/cleanup:
- Ventilate area of release. Eliminate all ignition sources. Stop spill or leak at source if safely possible. Contain material, preventing it from entering sewer lines or waterways. Use inert, non-combustible absorbents to assist the pick up of material. Scrape up product and place it into a container for disposal. Refer to Section 13 for disposal of contaminated material. Notify the appropriate authorities as required.

Prohibited materials:
- None known.

Special spill response procedures:
- If a spill/release in excess of the EPA reportable quantity is made into the environment, immediately notify the national response center in the United States (phone: 1-800-424-8002).
- US CERCLA Reportable quantity (RQ): None reported.
SECTION 7 - HANDLING AND STORAGE

Safe Handling procedures
Persons with recurrent skin eczema or sensitization problems should be excluded from working with this product. Once a person is sensitized, no further exposure to the material that caused the sensitization should be permitted. Wear suitable protective equipment during handling. Use with adequate ventilation. Training the workers on the potential health hazards associated with product vapor, dust or fume is important. Secondary inhalation exposures could occur when cleaning equipment, or when removing or laundering the clothing. Avoid breathing vapors, fumes or dust. Avoid contact with skin, eyes and clothing. Keep away from heat and sources of ignition. Keep away from oxidizing materials. Keep containers tightly closed when not in use. Wash thoroughly after handling.

Storage requirements
Store in a cool, dry, well-ventilated area. No smoking in the area. Do not store near any incompatible materials (see Section 10). Storage area should be clearly identified, clear of obstruction and accessible only to trained and authorized personnel. Protect against physical damage.

Incompatible materials
See Section 10.

Special packaging materials
Always keep in containers made of the same materials as the supply container.

SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

Ventilation and engineering measures
Use with adequate ventilation. Provide adequate cross air circulation. Use general or local exhaust ventilation to maintain air concentrations below recommended exposure limits.

Respiratory protection
Not required under normal conditions of handling. If mists are formed, or in confined spaces, respiratory protection may be required. NIOSH-approved respirators are recommended.

Skin protection
Impervious gloves must be worn when using this product. Advice should be sought from glove suppliers.

Eye / face protection
Safety glasses with side shields should be used with this product.

Other protective equipment
Wear sufficient clothing to prevent skin contact. An eyewash station and safety shower should be made available in the immediate working area.

General hygiene considerations
Avoid contact with eyes, skin and clothing. Avoid breathing vapors, fumes or dust. Do not eat, drink or smoke when using this product. Clean all equipment and clothing at end of each work shift.

Permissible exposure levels
For individual ingredient exposure levels, see Section 2.

</table>

SECTION 10 - REACTIVITY AND STABILITY DATA

Stability and reactivity
Stable under the recommended storage and handling conditions prescribed. Excessive heating above 50°C / 122°F may degrade the resin component. Mixing Part A and Part B may produce heat.

Hazardous polymerization
Polymerization occurs when components are mixed. Reaction is exothermic and can be hazardous depending on temperature and quantity.

Conditions to avoid
Extreme heat. Avoid contact with incompatible materials.
Materials To Avoid And Incompatibility
- Oxidizing agents; Acids; Bases; Amines.

Hazardous decomposition products
None known, refer to hazardous combustion products in Section 5.

SECTION 11 - TOXICOLOGICAL INFORMATION

Toxicological data
There is no available data for the product itself, only for the ingredients. See below for individual ingredient acute toxicity data.

</table>

Carcinogenic status
No components are listed as carcinogens by ACGIH, IARC, OSHA or NTP.

Reproductive effects
None known.

Teratogenicity
None known.

Mutagenicity
None known.

Epidemiology
Not available.

Sensitization to material
May cause severe skin sensitization with allergic contact dermatitis symptoms such as swelling, rash and eczema. No data available to indicate product or components may be respiratory sensitzers.

Synergistic materials
N/Av

Irritancy
Mild skin irritant. Moderate eye irritation.

other important hazards
See Section 3 for additional information.

SECTION 12 - ECOLOGICAL INFORMATION

Environmental effects
The product should not be allowed to enter drains or water courses, or be deposited where it can affect ground or surface waters. No data is available on the product itself.

Important environmental characteristics
N/Av

Ecotoxicological
No data is available on the product itself.

SECTION 13 - DISPOSAL CONSIDERATIONS

Handling for Disposal
Handle waste according to recommendations in Section 7.

Methods of Disposal
Dispose in accordance with all applicable federal, state, provincial and local regulations. Contact your local, state, provincial or federal environmental agency for specific rules.

RCRA
If this product, as supplied, becomes a waste in the United States, it may meet the criteria of a hazardous waste as defined under RCRA, Title 40 CFR 261. It is the responsibility of the waste generator to determine the proper waste identification and disposal method. For disposal of unused or waste material, check with local, state and federal environmental agencies.

SECTION 15 - REGULATORY INFORMATION

Canadian Information:

Canadian WHMIS Classification: This product is a WHMIS Controlled Product. It meets one or more of the criteria for a controlled product provided in Part IV of the Controlled Products Regulations (CPR). Refer to Section 1 for a WHMIS Classification for this product.

This product has been classified according to the hazard criteria of the CPR and the MSDS contains all of the information required by the CPR.

Canadian Environmental Protection Act (CEPA): All components of this product are on the Canadian DSL list.

US Federal Information:

TSCA: All listed ingredients appear on the Toxic Substances Control Act (TSCA) inventory.

CERCLA Reportable Quantity (RQ) (40 CFR 117.302): None reported.

SARA TITLE III: Sec. 313, Toxic Chemicals Notification, 40 CFR 372: This material is not subject to SARA notification requirements, since it does not contain any Toxic Chemical constituents above de minimus concentrations.

US State Right to Know Laws:

California Proposition 65: To the best of our knowledge, this product does not contain any chemicals known to the State of California to cause cancer or reproductive harm.

SECTION 16 - OTHER INFORMATION

Note: This product does NOT contain asbestos.

This material is classified as hazardous under OSHA regulations (29CFR 1910.1200).

SECTION 3 - HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW
Brown paste. Ammonia odour.
Danger!
Polymerization occurs when components are mixed. Potential for exothermic hazard. Prolonged contact may cause corrosive burns and eye damage. May cause severe irritation and corrosive damage in the mouth, throat and stomach. Harmful or fatal if absorbed through the skin. May cause skin sensitization.
If dusts are formed, prolonged inhalation may result in chronic respiratory disease.

***POTENTIAL HEALTH EFFECTS***

Target organs: Eyes, skin, respiratory system and digestive system.
Routes of exposure: Inhalation: YES Skin Absorption: NO Skin & Eyes: YES Ingestion: YES

Signs and symptoms of short-term (acute) exposure
Inhalation: May cause irritation to the nose, throat and upper respiratory tract. Symptoms may include sore throat, running nose and shortness of breath.

Skin: May cause moderate to severe skin irritation. Symptoms may include redness, itching and swelling. Prolonged contact may produce chemical burns to affected skin areas.

Eyes: Direct contact may strongly irritate or burn the eyes. Contact may cause redness, swelling and a painful sensation. Exposure to low vapour concentrations may cause swelling (edema) of the eyes, resulting in blurring of vision with a bluish haze and/or appearance of halos around lights.

Ingestion: May cause severe irritation and corrosive damage in the mouth, throat and stomach. Symptoms may include abdominal pain, nausea, vomiting, diarrhea and collapse.

Effects of long-term (chronic) exposure: Prolonged or repeated contact may cause drying, cracking and defatting of the skin. If dusts are formed, prolonged inhalation may result in chronic respiratory disease.

Conditions aggravated by overexposure: Pre-existing skin, eye and respiratory disorders.

Carcinogenic status: See TOXICOLOGICAL INFORMATION, Section 11.

Additional health hazards: Possible sensitizer. See TOXICOLOGICAL INFORMATION, Section 11.

Potential environmental effects: See ECOLOGICAL INFORMATION (Section 12).

### SECTION 4 - FIRST AID MEASURES

| Inhalation       | If inhaled, move to fresh air. If irritation persists, seek prompt medical attention. |
| Skin contact     | Remove contaminated clothing. Wash off with soap and plenty of water. Seek immediate medical attention/advice. |
| Eye contact      | Immediately flush eyes with running water for at least 15 minutes. Seek immediate medical attention/advice. |
| Ingestion        | Never give anything by mouth to an unconscious person. Do NOT induce vomiting. Seek immediate medical attention/advice. |
| Notes For Physician | Treat symptomatically. Prompt medical attention is important. |

### SECTION 5 - FIRE FIGHTING MEASURES

Fire hazards/conditions of flammability: Not flammable under normal conditions of use. Closed containers may rupture if exposed to excess heat or flame due to a build-up of internal pressure.

Flash point: > 171.1°C / 340°F

Flash point Method: N/Av

Auto-ignition temperature: N/Av

Upper flammable limit (% by vol.): N/Av

Lower flammable limit (% by vol.): N/Av

Oxidizing properties: None.

Flame Projection Length: Not applicable.

Flashback observed: Not applicable.

Explosion data: Sensitivity to mechanical impact / static discharge: Not expected to be sensitive to mechanical impact or static discharge.

Suitable extinguishing media: Dry chemical, foam, carbon dioxide and water fog. Do not use water jet, as this may spread burning material.

Special fire-fighting procedures/equipment: Firefighters should wear proper protective equipment and self contained breathing apparatus with full face piece operated in positive pressure mode. Move containers from fire area if safe to do so. Water spray may be useful in cooling equipment exposed to heat and flame. After fires have been extinguished, carefully clean all equipment and surfaces exposed to fumes.

Hazardous combustion products: Carbon oxides; Ammonia; nitrogen oxides (NOx); hydrogen cyanide; Aldehydes; Ketones; other unidentified organic compounds.

### SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions: Restrict access to area until completion of clean-up. All persons dealing with clean-up should wear the appropriate chemically protective equipment. Refer to point 8 on this Safety Data Sheet, EXPOSURE CONTROLS / PERSONAL PROTECTION, for additional information on acceptable personal protective equipment.

Environmental precautions: Do not allow product to enter waterways. Do not allow material to contaminate ground water system.
Spill response/cleanup: Ventilate area of release. Eliminate all ignition sources. Stop spill or leak at source if safely possible. Contain material, preventing it from entering sewer lines or waterways. Use inert, non-combustible absorbents to assist the pick up of material. Scrape up product and place it into a container for disposal. Refer to Section 13 for disposal of contaminated material. Notify the appropriate authorities as required.

Prohibited materials: None known.

Special spill response procedures: If a spill/release in excess of the EPA reportable quantity is made into the environment, immediately notify the national response center in the United States (phone: 1-800-424-8002).

US CERCLA Reportable quantity (RQ): None reported.

SECTION 7 - HANDLING AND STORAGE

Safe Handling procedures: Persons with recurrent skin eczema or sensitization problems should be excluded from working with this product. Once a person is sensitized, no further exposure to the material that caused the sensitization should be permitted. Wear suitable protective equipment during handling. Use with adequate ventilation. Training the workers on the potential health hazards associated with product vapor, dust or fume is important. Secondary inhalation exposures could occur when cleaning equipment, or when removing or laundering the clothing. Avoid breathing vapors, fumes or dust. Avoid contact with skin, eyes and clothing. Keep away from heat and sources of ignition. Keep away from oxidizing materials. Keep containers tightly closed when not in use. Wash thoroughly after handling.

Storage requirements: Store in a cool, dry, well-ventilated area. No smoking in the area. Do not store near any incompatible materials (see Section 10). Storage area should be clearly identified, clear of obstruction and accessible only to trained and authorized personnel. Protect against physical damage.

Incompatible materials: See Section 10.

Special packaging materials: Always keep in containers made of the same materials as the supply container.

SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

Ventilation and engineering measures: Use with adequate ventilation. Provide adequate cross air circulation. Use general or local exhaust ventilation to maintain air concentrations below recommended exposure limits.

Respiratory protection: In case of insufficient ventilation wear suitable respiratory equipment. NIOSH-approved, organic vapour cartridge respirators are recommended. Advice should be sought from respiratory protection specialists.

Skin protection: Impervious gloves must be worn when using this product. Advice should be sought from glove suppliers. Chemical splash goggles are recommended.

Eye / face protection: Wear sufficient clothing to prevent skin contact. An eyewash station and safety shower should be made available in the immediate working area.

Other protective equipment: General hygiene considerations: Avoid contact with eyes, skin and clothing. Avoid breathing vapors, fumes or dust. Do not eat, drink or smoke when using this product. Clean all equipment and clothing at end of each work shift. Separate contaminated work clothes from street clothes. Contaminated work clothing should not be allowed out of the workplace.

Permissible exposure levels: For individual ingredient exposure levels, see Section 2.
