### SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 **Product identifier**

Trade name: Surf City Garage Barrier Reef Spray Wax

1.1.6 **Other means of identification**

Product number: SCG 591

1.2 **Relevant identified uses of the substance or mixture and uses advised against**

Relevant identified uses: vehicle reconditioning fluid

1.3 **Details of the supplier of the safety data sheet**

Surf City Garage
5872 Engineer Dr.
Hunting Beach, CA 92649
Ph. 1-866-970-7872

1.4 **Emergency telephone number**

Emergency information service: USA 1.800.535.5053, INTL 1.352.323.3500

24 hour emergency telephone number.

### SECTION 2: Hazards identification

2.1 **Classification of the substance or mixture**

<table>
<thead>
<tr>
<th>Annex</th>
<th>Classification</th>
<th>Hazard class and category</th>

</tbody>
</table>

**Remarks**

For full text of H-phrases: see SECTION 16.

**Hazards not otherwise classified**

Very toxic to aquatic life with long lasting effects (GHS category 1: aquatic toxicity - acute and chronic).

**The most important adverse physicochemical, human health and environmental effects**

The product is combustible and can be ignited by potential ignition sources.
2.2 Label elements

Labelling acc. to OSHA "Hazard Communication Standard" (29 CFR 1910.1200)

Signal word: danger

Pictograms
GHS02, GHS07, GHS08

Hazard statements

- H226: Flammable liquid and vapor.
- H304: May be fatal if swallowed and enters airways.
- H315: Causes skin irritation.
- H340: May cause genetic defects.
- H350: May cause cancer.
- H361fd: Suspected of damaging fertility. Suspected of damaging the unborn child.

Precautionary statements

Precautionary statements - prevention
Obtain special instructions before use.
Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

Precautionary statements - response
IF SWALLOWED: immediately call a POISON CENTER or doctor/physician.
IF exposed or concerned: get medical advice/attention.
Do NOT induce vomiting.
In case of fire: Use sand, carbon dioxide or powder extinguisher to extinguish.

Precautionary statements - storage
Store in a well-ventilated place. Keep cool.

Hazardous ingredients for labelling: Stoddard Solvent, dimethylsiloxane cyclic tetramer, odorless mineral spirits

2.3 Other hazards
There is no additional information.
SECTION 3: Composition/information on ingredients

For full text of abbreviations: see SECTION 16.

SECTION 4: First aid measures

4.1 Description of first aid measures

General notes
Do not leave affected person unattended. Remove victim out of the danger area. Keep affected person warm, still and covered. Take off immediately all contaminated clothing. In all cases of doubt, or when symptoms persist, seek medical advice. In case of unconsciousness place person in the recovery position. Never give anything by mouth.

Following inhalation
In case of respiratory tract irritation, consult a physician. Provide fresh air.
After contact with skin, take off immediately all contaminated clothing, and wash immediately with plenty of water.

Irrigate copiously with clean, fresh water, holding the eyelids apart. Remove contact lenses, if present and easy to do. Continue rinsing.

Rinse mouth with water (only if the person is conscious). Do NOT induce vomiting.

In case of insufficient ventilation and/or in use, may form flammable/explosive vapor-air mixture. Solvent vapors are heavier than air and may spread along floors. Places which are not ventilated, e.g. unventilated below ground level areas such as trenches, conduits and shafts, are particularly prone to the presence of flammable substances or mixtures. Explosive when mixed with combustible material.

nitrogen oxides (NOx), carbon monoxide (CO), carbon dioxide (CO2)

In case of fire and/or explosion do not breathe fumes. Co-ordinate firefighting measures to the fire surroundings. Do not allow firefighting water to enter drains or water courses. Collect contaminated firefighting water separately. Fight fire with normal precautions from a reasonable distance.

Remove persons to safety.

Wear breathing apparatus if exposed to vapors/dust/aerosols/gases.

Keep away from drains, surface and ground water. Retain contaminated washing water and dispose it.
6.3 Methods and material for containment and cleaning up

Advices on how to contain a spill
Covering of drains.

Advices on how to clean up a spill
Wipe up with absorbent material (e.g. cloth, fleece). Collect spillage (sawdust, kieselgur (diatomite), sand, universal binder).

Appropriate containment techniques
Use of adsorbent materials.

Other information relating to spills and releases
Place in appropriate containers for disposal. Ventilate affected area.

Reference to other sections

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Recommendations

Measures to prevent fire as well as aerosol and dust generation
Use local and general ventilation. Avoidance of ignition sources. Keep away from sources of ignition - No smoking. Take precautionary measures against static discharge. Use only in well-ventilated areas. Due to danger of explosion, prevent leakage of vapours into cellars, flues and ditches. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools.

Warning
Places which are not ventilated, e.g. unventilated below ground level areas such as trenches, conduits and shafts, are particularly prone to the presence of flammable substances or mixtures. Vapors are heavier than air, spread along floors and form explosive mixtures with air. Vapors may form explosive mixtures with air.

Advice on general occupational hygiene
Wash hands after use. Do not to eat, drink and smoke in work areas. Remove contaminated clothing and protective equipment before entering eating areas. Never keep food or drink in the vicinity of chemicals. Never place chemicals in containers that are normally used for food or drink. Keep away from food, drink and animal feeding-stuffs.

7.2 Conditions for safe storage, including any incompatibilities

Managing of associated risks
• Explosive atmospheres
Keep container tightly closed and in a well-ventilated place. Use local and general ventilation. Keep cool. Protect from sunlight.
• **Flammability hazards**
  Keep away from sources of ignition - No smoking. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Take precautionary measures against static discharge. Protect from sunlight.

**Incompatible substances or mixtures**
Observe compatible storage of chemicals.

**Control of the effects**

**Protect against external exposure, such as**

**frost**

**Consideration of other advice**

**Ventilation requirements**
Use local and general ventilation. Ground/bond container and receiving equipment.

**Packaging compatibilities**
Only packagings which are approved (e.g. acc. to ADR) may be used.

7.3 **Specific end use(s)**
See section 16 for a general overview.

---

**SECTION 8: Exposure controls/personal protection**

8.1 **Control parameters**

**National limit values**

**Occupational exposure limit values (Workplace Exposure Limits)**

<table>
<thead>

</tbody>
</table>

**Notation**

**STEL**
Short-term exposure limit: a limit value above which exposure should not occur and which is related to a 15-minute period unless otherwise specified.

**TWA**
Time-weighted average (long-term exposure limit): measured or calculated in relation to a reference period of 8 hours time-weighted average.

**Relevant DNELs/DMELs/PNECs and other threshold levels**
No data available.
8.2 Exposure controls

Appropriate engineering controls
General ventilation.

Individual protection measures (personal protective equipment)

Eye/face protection
Wear eye/face protection.

Skin protection

• hand protection
Wear suitable gloves. Chemical protection gloves are suitable, which are tested according to EN 374. Check leak-tightness/impermeability prior to use. In the case of wanting to use the gloves again, clean them before taking off and air them well. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves.

• other protection measures
Take recovery periods for skin regeneration. Preventive skin protection (barrier creams/ointments) is recommended. Wash hands thoroughly after handling.

Respiratory protection
In case of inadequate ventilation wear respiratory protection.

Environmental exposure controls
Use appropriate container to avoid environmental contamination. Keep away from drains, surface and ground water.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance
Physical state: liquid
Color: turquoise
Odor: fruity

Other physical and chemical parameters
pH (value): 9.3 at 25 °C
Melting point/freezing point: not determined
Initial boiling point and boiling range: >65 °C at 1 atm
Flash point: 54 °C at 101.3 kPa 129 °F at 1 atm (closed cup)
Evaporation rate: not determined
Flammability (solid, gas): not relevant (fluid)
**SECTION 10: Stability and reactivity**

10.1 **Reactivity**
- Concerning incompatibility: see below "Conditions to avoid" and "Incompatible materials". The mixture contains reactive substance(s): risk of ignition
  - **if heated**
    - risk of ignition

10.2 **Chemical stability**
- See below "Conditions to avoid".

10.3 **Possibility of hazardous reactions**
- No known hazardous reactions.

10.4 **Conditions to avoid**
- Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
  - **Hints to prevent fire or explosion**
    - Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge.
    - **Physical stresses which might result in a hazardous situation and have to be avoided**
      - strong shocks
10.5 Incompatible materials
There is no additional information.

Hazardous decomposition products
Reasonably anticipated hazardous decomposition products produced as a result of use, storage, spill and heating are not known. Hazardous combustion products: see section 5.

SECTION 11: Toxicological information

11.1 Information on toxicological effects
Test data are not available for the complete mixture.

Classification procedure
The method for classification of the mixture is based on ingredients of the mixture (additivity formula).

Classification acc. to OSHA "Hazard Communication Standard" (29 CFR 1910.1200)

Acute toxicity
Shall not be classified as acutely toxic.

Skin corrosion/irritation
Causes skin irritation.

Respiratory or skin sensitization
Shall not be classified as a respiratory or skin sensitizer.

Summary of evaluation of the CMR properties
May cause genetic defects.
May cause cancer.
Suspected of damaging the unborn child.
Suspected of damaging fertility.

Carcinogenicity
- National Toxicology Program (United States): none of the ingredients are listed
- IARC Monographs none of the ingredients are listed

Specific target organ toxicity (STOT)
Shall not be classified as a specific target organ toxicant.

Aspiration hazard
May be fatal if swallowed and enters airways.
12.1 Toxicity

Aquatic toxicity (acute)

Shall not be classified as hazardous to the aquatic environment.

Aquatic toxicity (acute) of components of the mixture

Data are not available.

12.6 Other adverse effects

Data are not available.

**SECTION 13: Disposal considerations**

13.1 Waste treatment methods

**Waste treatment-relevant information**

Solvent reclamation/regeneration.

**Sewage disposal-relevant information**

Do not empty into drains. Avoid release to the environment. Refer to special instructions/safety data sheets.
Waste treatment of containers/packages
Completely emptied packages can be recycled. Handle contaminated packages in the same way as the substance itself.

13.3 Remarks
Please consider the relevant national or regional provisions. Waste shall be separated into the categories that can be handled separately by the local or national waste management facilities.

SECTION 14: Transport information

14.1 UN number
1993

14.2 UN proper shipping name
FLAMMABLE LIQUID, N.O.S.

14.3 Hazardous constituents
odorless mineral spirits, dimethylsiloxane cyclic tetramer

14.4 Transport hazard class(es)
Class 3 (flammable liquids)

14.5 Packing group
III (substance presenting low danger)

14.6 Environmental hazards
none (non-environmentally hazardous acc. to the dangerous goods regulations)

14.6 Special precautions for user
There is no additional information.

14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
The cargo is not intended to be carried in bulk.

14.8 Information for each of the UN Model Regulations
• Transport of dangerous goods by road or rail (49 CFR US DOT)

Index number
1993

Proper shipping name
Flammable liquid, n.o.s.

Class
3

Packing group
