Section 4. FIRST-AID MEASURES

Inhalation: Remove to fresh air. If breathing is difficult or if symptoms persist, get medical attention.

Skin contact: Wash with soap and water. If irritation or rash develops, get medical attention. If material is hot, submerge injured area in cold water. Do not remove material bonded to the skin. Do not apply ointment. Get medical attention. If victim is severely burned, remove to a hospital immediately.

Eye contact: None required at ambient temperatures. If material is hot, treat for thermal burns and seek medical attention.

Ingestion: If small amounts are swallowed, rinse mouth with water. Do not induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention.

Most important symptoms/effects, acute and delayed: May cause skin sensitization.

Indication of immediate medical attention and special treatment, if necessary: Immediate medical attention is not required at ambient temperatures.

Section 5. FIRE-FIGHTING MEASURES

Suitable (and unsuitable) extinguishing media: Use dry chemical, foam, or carbon dioxide to extinguish. Water may be ineffective but can be used to cool exposed containers and structures and disperse flammable vapors. Caution should be exercised when using water or foam as frothing may occur.

Specific hazards arising from the chemical: Not classified as flammable but product will burn under fire conditions. Combustion may produce carbon monoxide, carbon dioxide and other products of incomplete combustion.

Special protective equipment and precautions for fire-fighters: Firefighters should wear positive pressure self-contained breathing apparatus and full protective clothing. Cool fire exposed containers with water.

Section 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment, and emergency procedures: Avoid contact with hot material.

Environmental hazards: None known.

Methods and materials for containment and cleaning up: At ambient temperatures, pick up material and place into a container for disposal. If molten, allow material to solidify and cool. Pick up or scrape up and place into a container for disposal.

Section 7. HANDLING AND STORAGE

Precautions for safe handling: Avoid contact with molten material. Avoid breathing vapors or fumes. Use with adequate ventilation. Take precautions in use to prevent a fire hazard.

Conditions for safe storage, including any incompatibilities: Store in a dry, well ventilated area away from heat, direct sunlight and all sources of ignition.

Section 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure guidelines:

<table>
<thead>
<tr>
<th>Material</th>
<th>Exposure Guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Polyethylene</td>
<td>None Established</td>
</tr>
<tr>
<td>Paraffin Wax</td>
<td>2 mg/m³ TWA ACGIH TLV (as paraffin wax fume)</td>

<td>5 mg/m³ TWA (respirable fraction), 15 mg/m³ TWA (total dust) OSHA PEL</td>
</tr>
<tr>
<td>Citronella oil</td>
<td>None Established</td>
</tr>
</tbody>
</table>
Appropriate engineering controls: General ventilation should be adequate for normal use.

Individual protection measures, such as personal protective equipment:
Respiratory protection: None needed under normal use conditions.
Skin protection: Wear impervious gloves such as rubber gloves if needed to avoid skin contact. Wear insulated gloves when handling hot material.
Eye protection: None needed if handling product at ambient temperatures. Wear safety glasses when handling hot material.
Other: Clothing with long sleeves should be worn when working with molten product.
